

Sunshields and Lotto Scanner Base

Equipment Overview

Sunshields

Light proof shields that provide protection to light exposure, to support accurate results for scanning of tickets and selection slips.

Lotto Scanner Base and Mount Options

The LVI Technician will discuss the various options available to your site. Having a base or mount is at the Retailer’s discretion.

Here’s two of the options for your consideration.

Freestanding (No base)

Avoids sticking or drilling to the counter.

Magnetic Mount

Small magnets keep the scanner in place on the base.

Small sticky strips hold it in place on the counter.
