# Online Games
## Number of Tickets Feature

Players can purchase multiple tickets with the **same** play numbers or **different** play numbers using the 'Number of Tickets' feature. However, it's important to understand the type of Ticket a Player is requesting, as this feature must be accessed from two different places, resulting in significantly different outcomes.

### Does the Player want to purchase multiple tickets with <u>different</u> numbers?
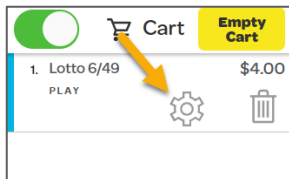

**Quick Pick** screen

**Different** main game play numbers

(This is the equivalent to printing multiple Tickets as separate transactions)

### Does the Player want to purchase multiple tickets with the <u>same</u> numbers?

**Gear** icon in the Cart

**Same** main game play numbers

(This is the equivalent of running a Selection Slip through multiple times)

**Every ticket is unique,** regardless of the method used to print multiple Tickets because:

- System generated numbers, such as The Extra, the Gold Ball Number, Lotto Max lines 2 and 3, Wager ID and the Ticket Control Number are always different on every Ticket.

- Every ticket has a unique Wager ID and Control Number. The Wager ID is a new reference number BCLC will use to identify Online Tickets, similar to the Ticket Control Number.

## Number of Tickets Feature
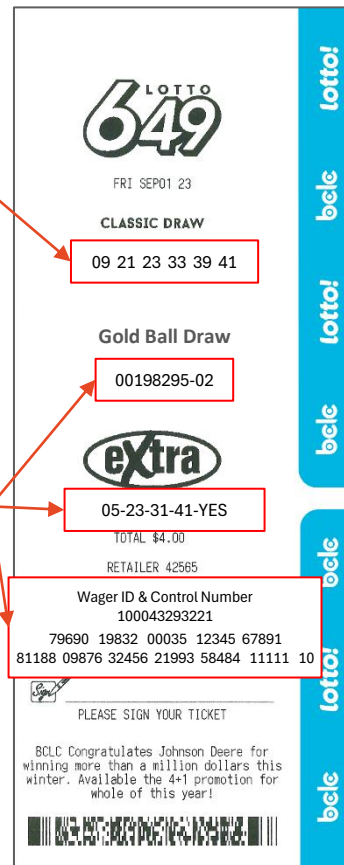

### Quick Pick Screen

- Multiple Tickets with <u>different play numbers for the main game.</u>
- Each Ticket will display as a separate line item in the Cart with the associated cost.

**Ticket 1**                                      **Ticket 2**

Different

Different system-generated number.
