The Cart – On or Off

The Cart is a fundamental feature that plays a crucial role in the Retailer and Player experience during a Lottery transaction. This information sheet explains the behaviours that arise when the Cart is set to On or Off.

How Does the Cart Toggle Work?

In the top left corner of the Cart, you will see a toggle button:

Green turns the Cart on.
(Checkout feature is available)

Keeping the Cart on, provides the ability to verify a Player's order before tapping Checkout to complete the sale.

Grey turns the Cart off.
(Checkout feature is not available)

For a comprehensive overview of how the Cart works when toggled on.

Questions & Answers

Is there a way to get the final amount the Player owes (Processed Cost) before printing Online Tickets?

With both the Cart on or off, the final amount owing, which includes any promotional pricing, only displays in Processed Cost after Tickets are printed.

It remains **best practice** to keep Tickets (printed Online Tickets & Scratch & Win) out of reach from the customer until after their payment has been confirmed.
