

New Web Cash Vouchers

Activation Product

What is it?

Since December 2, 2024, Web Cash requires activation like Scratch & Win Tickets, streamlining lottery operations for retailers.

Important!

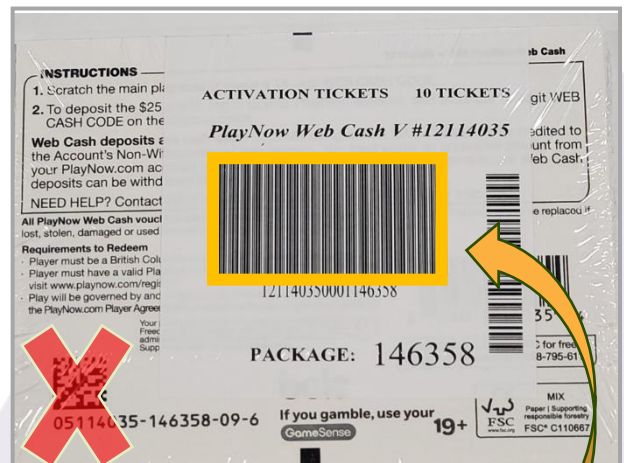

- Same as Scratch & Win Activation Tickets.
- Must receive the order on the Lottery Terminal.
- **Must scan Web Cash to Cart and Checkout to process the sale and update inventory reporting.**
- When scanning a full pack for sale, cover the data matrix on the top ticket to avoid an erroneous input.

\$25 Web Cash

Questions & Answers

Why is it necessary to activate Web Cash when there are no prizes to validate?

Activating lottery products goes beyond simply enabling validation. It triggers inventory movement and sales reporting. Additionally, activating Web Cash allows payment terms to align seamlessly with your sweep cycle.

Will the Web Cash voucher work if the retailer who sold it does not activate it?

Yes, the voucher will still work for the player. However, the retailer who sold the inactive product will face negative impacts, such as inaccurate inventory and sales reporting.

Are there any changes for the player when using Web Cash to load their PlayNow wallet?

No, the new Web Cash voucher works the same as the previous version. Similar to a gift card, the player reveals the redemption code to deposit funds into their verified PlayNow.com account.
